

Mauro Ponce

Software Engineer | Ruby on Rails Tech Lead

Hands-on technical lead with 15+ years designing, modernizing, and scaling business-critical web applications. Deep experience guiding long-running Rails systems from legacy versions through Rails 8.1, mentoring teams, and aligning technical roadmaps with business goals.

Relevant Experience

Lead Ruby on Rails Developer · **Corefact** Aug 2020 — Jul 2026

- Maintain and scale Corefact's high-traffic Rails 2.3, jQuery, and Bootstrap monolith, preserving stability and backward compatibility while resolving technical debt.
- Owned AI Assistant by Corefact over the last year, developing and operating a Rails 8.1 product with Stripe, Docker, Solid Queue, OpenAI API, Twilio, Pundit, external voice providers, deployments, monitoring, project management, and a four-person team.
- Used the latest AI tools to speed delivery, improve code review, build advanced UIs, and ship OpenAI-powered features in Mithril.js and Astro.
- Introduced Docker-based development and deployment workflows, simplifying infrastructure management and multi-environment consistency.
- Managed and mentored distributed junior and mid-level developers through code review standards, onboarding, task breakdown, sprint planning, and technical roadmaps.
- Owned full-stack product development for platforms serving thousands of users with Rails, PostgreSQL, MySQL, Redis, and high-throughput background processing.

Sr Ruby on Rails Developer · **Design Pickle** Sept 2019 — July 2020

- Worked on Design Pickle's creative-as-a-service platform for requesting and managing graphic design, motion, and illustration work, contributing Rails 5.2 product features and Stripe subscription billing flows.

Sr Ruby on Rails Developer · **Corefact** Sept 2014 — Aug 2019

- Worked on Corefact's Rails 2.3 monolith with jQuery, Bootstrap, and Authorize.net payments, supporting production stability for business-critical workflows.
- Started a new Rails 4 project from scratch using Devise, CanCan, Sidekiq, Redis, RSpec, and Capistrano.

Ruby on Rails Developer · **Flowics** June 2012 — Aug 2014

- Built and scaled Flowics, a high-concurrency cloud platform for live broadcast graphics, social media integration, and real-time audience engagement.
- Delivered full-stack Rails 3, Backbone.js, and Bootstrap features optimized for low-latency live media experiences.

Java Developer · **Cubecorp** Nov 2010 — June 2012

- Maintained enterprise credit account management systems, financial reporting applications, and fraud detection tools.
- Engineered transactional backend components with Java 6, JPA, EJB3, and Web Services.

Java Developer · **Epidata Consulting S.R.L.** Sept 2009 — Nov 2010

- Contributed to the reengineering of a core banking compensation system for Banelco, translating complex financial workflows into technical specifications.

Skills

Leadership & Process

Technical mentoring, architecture & system design, code reviews, Agile/Scrum, sprint planning, roadmaps, stakeholder communication, onboarding

Backend & Architecture

Ruby, Rails 2.3–8.1, Rails 4, Rails 5.2, Active Record, REST APIs, MVC, Devise, CanCan, Java, Hibernate

Data, Jobs & Scale

PostgreSQL, MySQL, Redis, Sidekiq, Solid Queue, Active Job, query optimization, indexing, partitioning

Frontend & Modern Rails

Hotwire, Turbo, Stimulus, Tailwind CSS, JavaScript, TypeScript, React, Astro, HTML, CSS, Mithril.js

Cloud, DevOps & Testing

Docker, Capistrano, AWS EC2/S3/RDS, GitHub Actions, RSpec, Minitest, Capybara, New Relic, Airbrake, Authorize.net, Stripe, OpenAI API, Twilio, Pundit

Selected Projects

AI Assistant by Corefact

Rails 8.1 AI assistant for print marketing leads with OpenAI API, Twilio, external voice providers, Solid Queue, Pundit, Stripe, Docker, AI-assisted review/UI delivery, deployments, and monitoring.

Corefact Rails Platform

Production Rails 2.3 monolith stewardship plus a new Rails 4 platform with Devise, CanCan, Sidekiq, Redis, RSpec, and Capistrano.

Flowics Platform

High-concurrency live broadcast and social media engagement platform built with Rails 3, Backbone.js, and Bootstrap.

Education

Universidad Argentina de la Empresa (UADE)

Software Engineering Degree, 2008 — 2016

Languages & Certification

Spanish: Native
English: Advanced
Cambridge First Certificate in English (FCE)
